Аннотированный каталог афротропических Dolichopodoidea (Diptera). Гричанов И.Я. Санкт-Петербург: ВИЗР, 2018, 152 с. (Приложения к журналу «Вестник защиты растений», №25).

An annotated catalogue of Afrotropical Dolichopodoidea (Diptera). Igor Ya. Grichanov. St.Petersburg: VIZR, 2018, 152 p. («Plant Protection News, Supplements», N25).

Впервые после 1980-го года составлен каталог хищных мух-зеленушек Dolichopodidae и Microphoridae тропической Африки. Для этого использован список названий зеленушек, который начал формироваться как «Интерактивная база данных ДолиБанк» во Всероссийском институте защиты растений (ВИЗР) с конца 90-х годов XX века на основе системного подхода с учетом глобальных библиографических ресурсов. Ныне ДолиБанк представляет собой ежемесячно обновляемый электронный ресурс (<http://grichanov.aiq.ru/Genera3.htm>), организованный как алфавитный список родов с гиперссылками к спискам видовых названий с библиографическими описаниями (регистрация в ЦИТиС № 50201151234 от 27.09.2011). В 2014 г. и 2017 г. он был опубликован в № 14 и № 23 *Приложений к журналу Вестник защиты растений*. Афротропический каталог содержит 91 известный в настоящее время род и 775 валидных названий видов и подвидов, а также два вида, описанных из ископаемых смол Танзании и два вида с французских субантарктических островов на юге Индийского океана. Включены оригинальные родовые комбинации видов, синонимы, невалидные названия родов и видов, употреблявшиеся в региональной литературе, типовые местообитания и глобальное распространение по состоянию на 1 января 2018 г. В приложении приведены справочные списки по странам и территориям Афротропической (Эфиопской) области.

Настоящая электронная книга предназначена для использования специалистами, работающим как в научно-исследовательских, так и учебных учреждениях, – энтомологами и экологами, интересующимися энтомофагами, студентами и аспирантами учебных и научных учреждений.

## INTRODUCTION

The family Dolichopodidae, or long-legged flies, with about 8000 species, occurs on all continents except Antarctica (but two species have been reported from some subantarctic islands). The family Microphoridae (small dance flies) contains over 50 mainly Holarctic species (Grichanov, 2017). The two families form the epifamily Dolichopodoidea (Grichanov, 2011*d*, 2017), whereas the other families of the superfamily Empidoidea are included into the epifamily Empidoidea (Grichanov, 2011*d*, Kustov, 2016). Twenty one fossil microphorids and 102 fossil dolichopodids are known, of which only two species have been described from the Afrotropical Region (from the rather recent Zanzibaran copal). Pollet & Brooks (2008), Grichanov (2017) and Grichanov & Brooks (2017) provide a detailed overview of the morphological characters of the epifamily, families and subfamilies, biology, classification and identification resources. It is hoped that the current catalogue, in combination with the key to 90 Afrotropical genera in Grichanov & Brooks (2017), provides a resource for continued work on Afrotropical Dolichopodoidea. At present, 775 valid species are registered in this Region. As is the case for many families of Afrotropical Diptera, a large number of new species of Dolichopodidae await discovery.

The following re-combinations (**comb. nov.**) are here proposed: *Chrysotus africanus* (Parent, 1934) (*Achradocera*), *C. ealensis* (Parent, 1936) (*Achradocera*), *C. rutshuruensis* (Vanschuytbroeck, 1951) (*Achradocera*), *C. wulfi* (Parent, 1936) (*Achradocera*), *Peloroepodes madagascariensis* (Dyte & Smith, 1980) (*Chrysotus*) [= *Peloroepodes flavus* (Vanschuytbroeck, 1957) (*Chrysotus*)].

In addition, “missing” re-combinations are established for several synonymic names: *Afrohercostomus longipilus* (Parent, 1934) (*Hercostomus*), *A. fuscipennis* (Vanschuytbroeck, 1964) (*Hercostomus*), *A. vanschuytbroeckii* (Dyte & Smith, 1980) (*Hercostomus*), *A. bururiensis* (Vanschuytbroeck, 1999) (*Hercostomus*), *Afropelastoneurus umbricola* (Parent, 1937) (*Pelastoneurus*), *Apelastoneurus benoiti* (Vanschuytbroeck, 1964) (*Pelastoneurus*), *A. vadoni* (Vanschuytbroeck, 1964) (*Paraclius*), *Hydatostega tristrimensis* (Walker, 1849) (*Medeterus*), *Neohercostomus minimixtus* (Dyte & Smith, 1980) (*Hercostomus*), *Rhaphium spiculum* (Vanschuytbroeck, 1952) (*Syntormon*), *Telmaturgus discolor* (Curran, 1926) (*Syntormoneura*), *T. superbus* (Vanschuytbroeck, 1951) (*Chrysotus*).

## FORMAT OF THE CATALOG

The Catalog begins from the family Microphoridae containing three species of *Schistostoma* Becker, 1902. Twelve subfamilies of Dolichopodidae (including Parathalassiinae) are arranged alphabetically, as well as genera within each subfamily. Two subantarctic species of Dolichopodidae (French Southern and Antarctic Lands in the South of Indian Ocean), two fossil species of Dolichopodidae from Zanzibaran copal and one doubtful species of the same family excluded from the Afrotropical Region are listed at the end of the Catalog. The other mainly Palaearctic species excluded from the Afrotropics are given at the end of corresponding generic lists. Two Palaearctic genera (*Anahydrophorus* Becker, 1917, and *Melanostolus* Kowarz, 1884) included in the previous Catalog (Dyte & Smith, 1980) are also excluded from the Afrotropics, but listed below in square brackets.

For each entry, nomenclatural details are given, including authorship, date, place of publication (in short for old literature, after Smith et al., 1980) and page. For the genus-group names, these details also include the type species and method for designation; each genus is followed by the list of valid subgenera, available and unavailable synonyms (if present) arranged chronologically, if only they were used by afrotropical references.

For the species-group names, these details also include type locality (for a species in its original combination). Secondary species combinations contain only authorship, year (in parenthesis), original genus of species description (in square brackets) and first reference for a new combination (in parenthesis). Quite numerous incorrect Latin spellings and errors are not included in the check list. Each entry for valid species combinations is followed by the list of invalid species combinations and synonyms. The main enumerated entries are ended with either distribution section or reference section; the latter includes references published after 1980 (if present). The country distribution lists provided is based on data from the most recent generic catalogs and revisions.

Appendix to this Catalog contains check-lists of Dolichopodidae species by countries and territories of the Afrotropical Region listed by Kirk-Spriggs & Sinclair (2017).

### ***Chrysotus* Meigen, 1824: 40**

*Chrysotus* Meigen, 1824: Syst. Besch. 4: 40. Type species: *Musca nigripes* Fabricius, 1794 [as understood by Meigen] (designation by Westwood, 1840: Intr. Classif. Ins., Synopsis: 134).

*Remarks*. Four species of Afrotropical *Achradocera* Becker, 1922 (examined) are transferred here to the closest genus *Chrysotus* because they do not fit the current generic concept of the latter (Bickel, 2000). Male antennal postpedicel in Afrotropical *Achradocera* have apical 1/2 very slender and drawn-out, bearing apical arista-like stylus, similar to that in the New World *Achradocera* and to some Nearctic and Australasian species of *Chrysotus* (Van Duzee, 1924; Bickel, 2000). Nevertheless, the numerous flattened setae on lower postocular surface of male are the main diagnostic character of *Achradocera*, contrasting with fine unmodified setae in Afrotropical species. So, the genus *Achradocera* is excluded here from the Afrotropical fauna.

Species of *Chrysotus* excluded from the Afrotropical Region:

- Chrysotus cilipes* (Meigen, 1824).  
*Chrysotus cupreus* (Macqart, 1828).  
*Chrysotus gramineus* (Fallén, 1823).  
*Chrysotus melampodius* Loew 1857.  
*Chrysotus suavis* (Loew, 1857).

*Remarks.* These Palaearctic species were recorded by Vanschuytbroeck (1951, 1952, 1957) from the Afrotropical Region. Treating several collections with the material identified by this author, I have not found any specimen of those species collected in DR Congo, Madagascar and South Africa. Therefore, I doubt their presence in Afrotropics.

185. *Hercostomus scotti* Grichanov, 1999c: International Journal of Dipterological Research 10(1): 19. Type locality: Yemen: W. Aden Prot., Wadi Dareija, S. W. of Dhala. *Afrotropical*: Yemen.
186. *Hercostomus selikhovkini* Grichanov, 1999c: International Journal of Dipterological Research 10(1): 17. Type locality: Tanzania: Uzungwe Mts., Mwanihana Forest above Sanje. *Afrotropical*: Tanzania.
187. *Hercostomus tobiasi* Grichanov, 1999c: International Journal of Dipterological Research 10(1): 27. Type locality: Cameroon: Musake. *Afrotropical*: Cameroon.
188. *Hercostomus wittei* Grichanov, 1999c: International Journal of Dipterological Research 10(1): 23. Type locality: Kenya: Aberdare Range, Kilembe. *Afrotropical*: DR Congo, Kenya.
189. *Hercostomus yakovlevi* Grichanov, 1999c: International Journal of Dipterological Research 10(1): 20. Type locality: Kenya: Aberdare Range, Thompsons Falls. *Afrotropical*: Kenya.

Doubtful Afrotropical species of *Hercostomus*:

*Hercostomus directus* (Walker, 1849) (Grichanov, 1999c: International Journal of Dipterological Research 10(1): 9, 38). Doubted by Grichanov, 2010g: International Journal of Dipterological Research 21(3): 186 (?*Afrohercostomus*).  
*Dolichopus directus* Walker, 1849: List Dipt. brit. Mus. 3: 663 (female).  
Type locality: South Africa.

*Hercostomus disjectus* Curran, 1926: Ann. S. Afr. Mus. 23: 397 (female). Type locality: South Africa: Matroosberg, Ceres Division. Excluded from Tanzania (Grichanov, 1999c: International Journal of Dipterological Research 10(1): 39). Doubted by Grichanov, 2010g: International Journal of Dipterological Research 21(3): 186 (?*Afrohercostomus*).

Species of *Hercostomus* excluded from Afrotropical Region:

*Hercostomus germanus* (Wiedemann, 1817). Excluded from Afrotropics by Grichanov (1999c: International Journal of Dipterological Research 10(1): 10, 40).

*Hercostomus fuscipennis* (Meigen, 1824). Excluded from Afrotropics by Grichanov (1999c: International Journal of Dipterological Research 10(1): 40).

*Hercostomus insularum* Becker, 1917. Excluded from Afrotropics by Grichanov (1999c: International Journal of Dipterological Research 10(1): 40).

*Hercostomus laufferi* (Strobl, 1909). Excluded from Afrotropics by Grichanov (1999c: International Journal of Dipterological Research 10(1): 41).

*Hercostomus stroblianus* Becker, 1917. Excluded from Afrotropics by Grichanov (1999c: International Journal of Dipterological Research 10(1): 41).

590. *Chrysosoma zinovjevi* Grichanov, 1997g: International Journal of Dipterological Research 8(1): 31. Type locality: Nigeria: Iloro (in subgen. Mesoblepharius: Grichanov, 1999b: Bull. Inst. r. Sci. nat. Belg., Entomologie 69: 126). *Afrotropical*: Nigeria.

Species of *Chrysosoma* excluded from Afrotropical Region:

*Chrysosoma lacteimicans* Becker, 1923. *Australasian*: Samoa.

*Remarks*: The species was recorded by Vanschuytbroeck (1951: 34) from DR Congo. Treating several collections with the material identified by this author, I have not found any specimen of this species. Bickel (1994: 210) did not include Afrotropics into the area of *C. lacteimicans*. In addition, its diagnoses provided by Vanschuytbroeck and Bickel belong apparently to different species.

*Chrysosoma leucopogon* (Wiedemann, 1824). *Australasian*: Australia, Belau, New Caledonia, New Guinea, Samoan Is., Tahiti; *Oriental*: China, Cocos-Keeling, India (East), Indonesia, Myanmar, ?Sri Lanka, Thailand [excl. from Afrotropical: Grichanov, 1998g: Bull. Inst. r. Sci. nat., Entomologie, 68: 101; Grichanov, 2011: Priamus Supplement 24: 24].

*Remarks*: The type of the species (examined) was most probably collected from the easternmost territories of India (e.g., Andaman and Nicobar Islands near Indonesia). The old records of *C. leucopogon* from the Afrotropical Region must be referred to *C. snelli* Curran, 1927.

Doubtful species of Afrotropical *Chrysosoma*:

*Chrysosoma carum* (Walker, 1849) [*Psilopus*] (Parent, 1934: Ann. Mag. nat. Hist. (10)13: 8)

*Psilopus carus* Walker, 1849: List Dipt. brit. Mus. 3: 643. Type locality: "Congo". [*Afrotropical*: DR Congo, Mozambique, Nigeria, Sierra Leone, South Africa, Tanzania]. *Remarks*: The species was described by a single female (NHML, not seen), which is probably unrecognisable. *C. flexum* (Loew) was for a long time considered a synonym of *C. carum* (Dyde & Smith, 1980: 444). I suspect that the old records of the latter from several countries (e.g., Vanschuytbroeck, 1951: 33, 1959: 25) belonged to *C. flexum* sensu Curran, 1924, nec Loew (now *C. tricrinatum* Parent, 1933).

*Chrysosoma flexum* (Loew, 1858) [*Psilopus*] (Becker, 1923: Ent. Mitt. (Berlin-Dahlem) 12(1): 19). *References*: Grichanov, 2003: Russian Entomological Journal 12(3): 341.

*Psilopus flexus* Loew, 1858: Öfvers. Vetensk.-Akad. Förhandl. (Stockholm) 14: 371. HT (female) [NHRS]. Type locality: South Africa.

*Remarks*: The species was described by a single female (examined, NHRS), which can not be associated with males of other known species, being probably unrecognisable. Becker placed *C. flexum* in synonymy with *C. senegalense* (Becker, 1923: 19, 33). Curran described a new species under the name *Chrysosoma flexum* (Curran, 1924: 217; Curran, 1926: 386), which was later associated with *C. tricrinatum* Parent, 1933 (Parent, 1933: 33). Parent (Parent, 1933: 43; Parent, 1934: 8) considered *C. flexum* (Loew) to be conspecific with *C. carum* (Walker), one more doubtful species described by a female (see above). Grichanov (2003) rejected this synonymy.

### Check-lists of Dolichopodoidae species by countries and territories of Afrotropical Region

[Type locality and distribution for *Chrysosoma trigemmans* (Walker, 1849) is not known]

#### Angola

1. *Afrohercostomus argyropus par* (Parent, 1934)
2. *Amblypsilopus auratus* (Curran, 1924)
3. *Amblypsilopus munroi* (Curran, 1924)
4. *Amblypsilopus nartshukae* Grichanov, 1996f
5. *Argyrochlamys angolensis* Grichanov, 2004
6. *Bickeliolus maslovae* (Grichanov, 1996)
7. *Chrysosoma angolense* Parent, 1933
8. *Chrysosoma consentium* Curran, 1925
9. *Chrysosoma schoutedeni* Curran, 1927
10. *Condylostylus erroneus* Grichanov, 2003
11. *Diaphorus lawrencei* Curran, 1926
12. *Hydrophorus praecox* (Lehmann, 1822)
13. *Lichtwardtia fractinervis* (Parent, 1929)
14. *Lichtwardtia tikhonovi* Grichanov, 1998k
15. *Medetera maynei* Curran, 1925
16. *Medetera norlingi* Grichanov, 1997f
17. *Pseudoparaclius miritarsus* (Grichanov, 2004)
18. *Pseudopelastoneurus diversifemur* (Parent, 1935)
19. *Tachytrechus alternatus* Curran, 1924
20. *Tachytrechus tessellatus* (Macquart, 1842)
21. *Thinophilus ciliventris* Grichanov, 1997
22. *Thinophilus indigenus* Becker, 1902
23. *Thinophilus palpatus* Parent, 1929
24. *Thinophilus prudens* Curran, 1926

#### Benin

1. *Lichtwardtia fractinervis* (Parent, 1929)
2. *Plagiozopelma inops* (Parent, 1929)
3. *Thinophilus indigenus* Becker, 1902

#### Botswana

1. *Afrohercostomus argyropus argyropus* (Loew, 1858)
2. *Afrohercostomus argyropus par* (Parent, 1934)
3. *Aphasmaphleps bandia* Grichanov, 2010a
4. *Asyndetus virgatus* Curran, 1926
5. *Bickeliolus maslovae* (Grichanov, 1996)
6. *Condylostylus imitator* Curran, 1924
7. *Diaphorus lawrencei* Curran, 1926
8. *Hydrophorus praecox* (Lehmann, 1822)
9. *Lichtwardtia angularis* (Macquart, 1842)
10. *Lichtwardtia sukharevae* Grichanov, 1998k
11. *Medetera norlingi* Grichanov, 1997f

12. *Medetera normalis* Curran, 1924
13. *Medetera polleti* Grichanov, 1997f
14. *Medetera subchevi* Grichanov, 1997f
15. *Tachytrechus alternatus* Curran, 1924
16. *Tachytrechus tessellatus* (Macquart, 1842)
17. *Thinophilus ciliventris* Grichanov, 1997
18. *Thinophilus imperialis* (Curran, 1924)
19. *Thinophilus palpatus* Parent, 1929
20. *Trigonocera rivosa* Becker, 1902

**British Overseas Territory (St. Helena)**

1. *Amblypsilopus longifilus* (Becker, 1923)
2. *Apelastoneurus emasculatus* (Parent, 1937)
3. *Campsicnemus flavissimus* Grichanov, 2012
4. *Campsicnemus magius* (Loew, 1845)
5. *Campsicnemus meridionalis* Grichanov, 2012
6. *Campsicnemus sanctaehelenae* Grichanov, 2012
7. *Dytomyia lutescens* (Vanschuytbroeck, 1952)
8. *Epithalassius corsicanus* Becker, 1910
9. *Ethiosciapus bicalcaratus* (Parent, 1933)
10. *Ethiosciapus inflexus* (Becker, 1923)
11. *Hydrophorus balticus* (Meigen, 1824)
12. *Medetera ambigua* (Zetterstedt, 1843)
13. *Rhaphium appendiculatum* Zetterstedt, 1849
14. *Saccopheronta caffra* (Curran, 1927)
15. *Syntormon flexibilis* Becker, 1922
16. *Syntormon pallipes pallipes* (Fabricius, 1794)
17. *Thrypticus bellus* Loew, 1869

**British Overseas Territory (Tristan da Cunha)**

1. *Hydatostega carmichaeli* (Walker, 1849)
2. *Hydatostega christopherseni* (Frey, 1954)
3. *Hydatostega tristanensis* (Macquart, 1847)
4. *Sympycnus basilaris* (Curran, 1924)

**Burundi**

1. *Afrohercostomus argyropus par* (Parent, 1934)
2. *Afrohercostomus congoensis* (Curran, 1925)
3. *Afrohercostomus eronis* (Curran, 1926)
4. *Afroparaclius thompsoni* (Grichanov, 2004)
5. *Amblypsilopus cuthbertsoni* (Parent, 1937)
6. *Amblypsilopus disjunctus* (Parent, 1936)
7. *Apelastoneurus bururi* (Grichanov, 2004)
8. *Chrysosoma alboguttatum* Parent, 1930
9. *Chrysosoma bacchi* Dyte, 1957
10. *Chrysosoma lavinia* Curran, 1927
11. *Chrysosoma stolyarovi* Grichanov, 1998g
12. *Chrysosoma tricrinitum* Parent, 1933
13. *Condylostylus burgeoni* Parent, 1935
14. *Condylostylus congensis* Curran, 1927

15. *Ethiosciapus bicalcaratus* (Parent, 1933)
16. *Ethiosciapus inflexus* (Becker, 1923)
17. *Medetera maynei* Curran, 1925
18. *Medetera normalis* Curran, 1924
19. *Medetera praedator aequatorialis* Grichanov, 2000b
20. *Mesorhaga tsurikovi* Grichanov, 1998g
21. *Rhaphium sexsetosum* (Vanschuytbroeck, 1951)
22. *Saccopheronta pulchra* Vanschuytbroeck, 1951
23. *Sympycnus basilaris* (Curran, 1924)
24. *Sympycnus du* Curran, 1929

### **Abstract**

A catalogue of Afrotropical Dolichopodidae (Diptera) is compiled for the first time since 1980. It includes 91 genus and 775 valid species and subspecies registered in this Region, two species described from the Zanzibaran copal (Tanzania) and two subantarctic species known from the South of Indian Ocean (French Southern and Antarctic Lands). For each entry, nomenclatural details are given, including authorship, date, place of publication (in short for old literature) and page. For the genus-group names, these details also include the type species and method for designation, the list of valid subgenera, available and unavailable synonyms (if present) arranged chronologically, if only they were used by afrotropical references. For the species-group names, the data also include type locality (for a species in its original combination). Secondary species combinations contain only authorship, year (in parenthesis), original genus of species description (in square brackets) and first reference for a new combination (in parenthesis). Each entry for valid species combinations is followed by the list of invalid species combinations and synonyms. The main enumerated entries are ended with either distribution section or reference section; the latter includes references published after 1980 (if present). The country distribution lists provided is based on data from the most recent generic catalogs and revisions. Appendix to the Catalog contains check-lists of Dolichopodidae species by countries and territories of the Afrotropical Region. Five valid species and 12 synonymic names are re-combined with various genera.

**KEY WORDS:** Afrotropical Region, Diptera, Dolichopodidae, Microphoridae, zoogeography, catalog, checklist, entomophage, predator.
